

NYN Group Records

Spring May 2012

Report

Hi all have been pulling all the corrections together and trying to get ready for the Spring Convention. I am working towards using only the WSO data base. This will be easier in the future and guarantee that all our information is correct and current at WSO. It is important that I receive complete information on changes. There is a new GR1 change form that is posted on our web site at present you can fill it out on line save it and send it to me as an attachment. I am hopeful that soon all you will have to do is hit a submit button at the bottom of the page.

At present I have 15 Groups that are in a no mail status, this is since the first of the year. When I provide the DR's with their reports these groups are listed in the reports, this means that mail has been returned to WSO. These groups will remain in this status for a period of time, and then WSO will class them as inactive. It is very important that every group have a CMA (current mailing address) this can be someone other than the GR. The DR's can also see these groups at their e-community, any DR that is not on their e-community please call WSO and they will assist you in the process.

WSO is using E-mail and the e-communities to communicate with the GR's and DR's, in turn they are requesting that Group Records verify the emails for the GR's.

A solution to simply things and not use a personal or business e-mail is to create one for the Group. Example as I did for Group Records (area39grouprecords@gmail.com) set a simple password and as the GR' change they simply pass on the address. There is no cost to set up a Gmail account.

At present we have 290 active AFG groups.
